

ADGA Referral Commission Demo

Complete Demo Testing & Working Process

B — REFERRER → C — CUSTOMER → A — OWNER / ADMIN

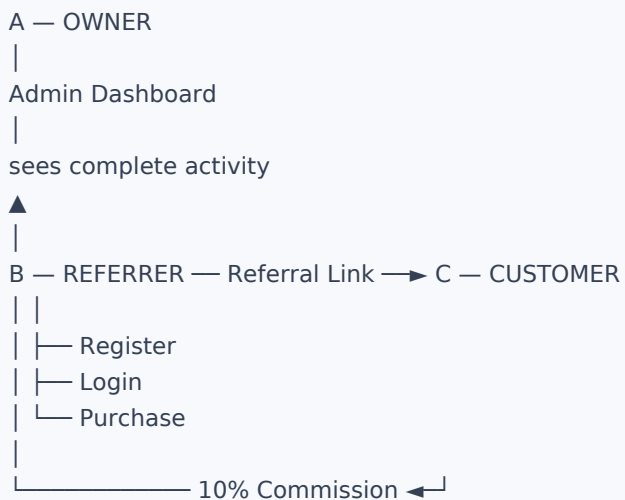

Purpose

This document provides the complete step-by-step process used to demonstrate the referral commission system requested for ADGA. It shows how B shares a referral link with C, how C registers and purchases, how commission is generated, and how A/Admin verifies the complete activity.

Demo environment

Backend API	http://localhost:5000
Referral link	http://localhost:5173/?ref=REF001
Demo service	Skillwise Demo Service — ₹10,000
Commission rate	10%
Expected commission	₹1,000

1. Referral Flow

Example

Service price	₹10,000
Commission rate	10%
Commission	₹1,000

Admin will see something like:

Referrer	Customer	Service	Purchase	Commission
B	C	Skillwise Demo	₹10,000	₹1,000

2. Step-by-Step Demo Testing Process

Step 1 — Start the Backend

Run the backend and confirm the API is available.

API: `http://localhost:5000`

First — Test B: Referrer Flow

Open Referrer Login and log in as the demo referrer.

Click: Referrer Login

Email: `referrer@example.com`

Password: `Referrer@123`

Step 2 — Act as C (Customer)

From the Referrer dashboard, copy the unique referral link.

`http://localhost:5173/?ref=REF001`

Important: Open it in an Incognito window so we simulate a new customer.

Chrome: `Ctrl + Shift + N`

Step 3 — Customer Registration

Open the Customer registration page and enter the customer details. Check that the referral code is carried from the referral link.

Name: Demo Customer

Email: `customer1@example.com`

Password: `Customer@123`

Referral Code: `REF001`

Registration Check

The referral code should be `REF001`. If it is automatically filled from the referral link, the referral attribution is being carried into registration.

Referral Code: `REF001`

Register → verify successful registration

Customer Login

Use the customer account created in the previous step and log in.

Email: `customer1@example.com`

Password: `Customer@123`

Then click Login.

Step 4 — Purchase Test

Use Skillwise Demo Service — ₹10,000. Click Purchase Demo under Skillwise.

Service: Skillwise Demo Service

Price: ₹10,000

Commission rate: 10%

Expected commission: ₹1,000

Commission Calculation

The system calculates the commission automatically using the current configured rate.

$\text{₹}10,000 \times 10\% = \text{₹}1,000$

Step 5 — B: Referrer Dashboard

Return to the normal browser where the Referrer dashboard was open. Verify the completed referral journey.

Expected:
Clicks: 1
Registrations: 1
Purchases: 1
Commission: ₹1,000

Step 6 — A: Owner/Admin

Log out if required, open Admin Login, and verify the complete referral activity.

Email: admin@example.com
Password: Admin@123

Expected:
Referrer: Demo Referrer
Customer: Demo Customer
Service: Skillwise Demo Service
Purchase: ₹10,000
Commission: ₹1,000
Status: Purchased

3. Final Verification Checklist

Check	Expected result	Status
Backend	API running on localhost:5000	✓
B login	Referrer can log in	✓
Referral link	Unique link contains REF001	✓
C detection	Referral link detected	✓
C registration	Customer registered with referral attribution	✓
C login	Customer accesses service catalogue	✓
Purchase	₹10,000 demo purchase recorded	✓
Commission	10% = ₹1,000	✓
B dashboard	1 click / 1 registration / 1 purchase / ₹1,000	✓
A dashboard	Complete referral activity visible	✓

Final demo result

B shares → C opens referral link → C registers → C logs in → C purchases → 10% commission is generated → B verifies the commission → A/Admin verifies the complete referral activity.

Client demonstration sequence

For the live demo, follow the steps in exactly this order: start backend → B Referrer Login → copy referral link → open Incognito → C registration → C login → Skillwise purchase → verify B dashboard → Admin Login → verify A dashboard.
